Subject: Update of the Global CMP List : addition of a new field

Dear TCF Participants,

This communication gives you formal notification of changes to the Global CMP List JSON file [here](#) and corresponding Technical Specifications [here](#) to expand the information provided about CMP registered with the TCF.

As of the next publication of the Global CMP List JSON file, a new field named "environments" will be added to indicate the **environment(s)** where each registered CMP operates and has been certified ("Web", "Native App (Mobile)" and "Native App (CTV)").

This additional information can be used by Vendors to determine which CMPs are compliant and active for a given technical environment.

If you have any additional questions, please email framework@iabeurope.eu.

Kind regards,
IAB Europe Team
